Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

1870 County and State

STATE: ICPSR state code

Based upon 2,364 valid cases out of 2,364 total cases.

- Mean: 38.45
- Median: 41.00
- Mode: 49.00
- Minimum: 1.00
- Maximum: 100.00
- Standard Deviation: 15.89

Location: 1-3 (width: 3; decimal: 0)

Variable Type: numeric

COUNTY: ICPSR county code

Based upon 2,364 valid cases out of 2,364 total cases.

- Mean: 965.03
- Median: 790.00
- Mode: 0.00
- Minimum: 0.00
